-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kejriwal et al U.S. Patent Number 6,704,794.

Re Claim 1, Kejriwal et al teaches a cell-processing pipeline having plurality of stages for cell assembly. Fig. 2 depicts Line Aggregation 202 (an interface) coupled to a public network for transmitting and receiving data packets and Packet aggregation 205, Packet Pipeline 240, Output Packet Organizer 250 (a plurality of packet processing portions) for sequentially processing the data packet according to the header information (See col. 3, lines 20 ~ col. 4, lines 1-28).

### ***Allowable Subject Matter***

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with Claims 1 and 2, prior art fails to teach the combination of packet processing portions, wherein a plurality of header analyzing processors for sequentially analyzing the packet to be analyzed transferred from the packet separation processor in accordance to a header encapsulated in the packet to be analyzed, and then reflecting an analyzed result in the tag of the packet to be analyzed, and outputting an analyzed packet and a packet reassembling processor for requesting the remainder of the packet to be analyzed stored in the packet separating processor.
